(Copy-Paste the URL displayed into Chrome Browser)

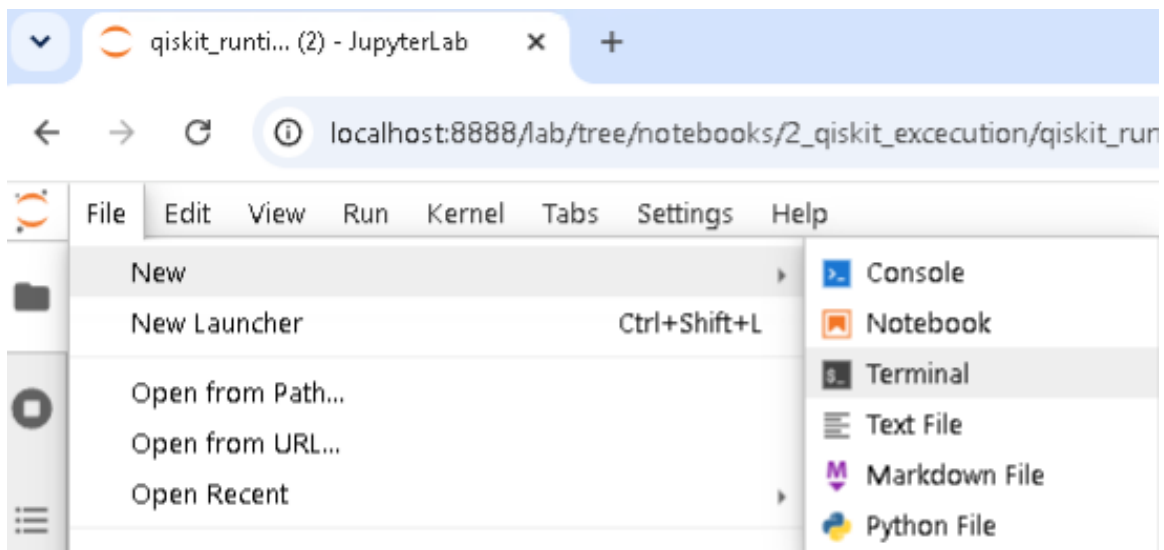

To copy-paste, simply select text with the mouse and the left button, when highlighted, right-click. Then open browser and ctrl+v in the url bar.

In the jupyter web based interface, I upload your zipped notebooks (using the pointing up arrow)

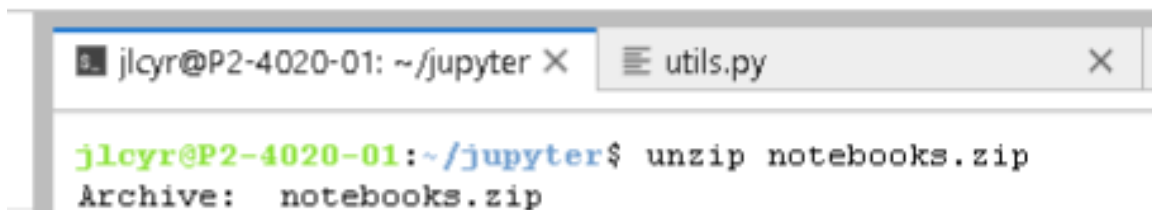

Then I open a terminal (shell) from file->new->terminal

I unzip the file with

`unzip notebooks.zip`

Then I simply navigate the folder in the left menu and open the notebook.
